Subject RE: Comments on proposed remediation plan, West Lake Landfill

Debbie,

I had to leave the office early today & I'm checking my e-mails from home. So, I don't know if we received the fax; I'll check in the morning.

Re the 06/24/08 County Council meeting, I didn't attend but that meeting is the reason that I'm tasked with drafting something from the County Executive to 'pacify' the complainants. Given what you've sent to me, I'm not sure what to draft.

Mike

Yes. I have a confirmation statment back for the fax I sent you at 12:53 p.m. Let me know if I should send it again, please?

I just pulled the minutes off of the June 24th St. Louis County Council website. Did you attend that meeting? Sounds like it generated quite a heated discussion!

Thank you for the clarification; that helps my current dilemma.

If my memory is correct, were you going to send (fax?) me the County Executive's comments also?

Mike

In June 2006, EPA released it's Proposed Plan for public comment. Within the Proposed Plan and included in the Fact Sheet (attached) you'll see EPA's preferred alternative.

So, I believe the answer to your question is.....EPA announced its preferred alternative. However, under the National Contingency Plan (NCP), there are nine (9) qualifiers for acceptance of an alternative, one of which is "community acceptance". This qualifier is considered a modifier, not a requirement.

RE: Comments on proposed
remediation plan, West Lake
Landfill

Debbie,

Based on the timing (08/15/06) of John Haasis' e-mail, was EPA only requesting comments re alternatives at that time? Or, had EPA already announced its preferred alternative?

Thanks for your help,

Mike

Comments on proposed remediation
plan, West Lake Landfill

The following are the comments submitted on the proposed remediation
plan for the West Lake Landfill OSU 1 & 2:

The Saint Louis County Department of Health has reviewed the proposed
remediation plan for the WestLake Landfill Operable Units 1&2. We are in
support of the alternatives proposed in the plan provided that long-term
care and monitoring is rigidly and thoroughly implemented. We would also
like to be kept informed of all aspects of the total remediation plan.
